CAREER PATH

The company is managed by technical leaders, risen internally through the ranks. The general manager, technical director, quality manager, R&D manager and recruitment director all started as software developers. For those not attracted by a management role and willing to continue an excellent technical work we have also a technical career path. The extent and type of your career depends only on your capability, determination and motivation.

THINK INTERNATIONALLY

Although we are located in attractive locations, we think and act internationally. We write most of our documents in English, run meetings in English and often travel abroad.

YOUR COLLEAGUES

The "INTECS style" is technical curiosity, good teamwork, deep and widespread collaboration, strong commitment, eagerness to learn and improve. Motivation is transmitted to one another and attracts motivated people.

I N N O V A T I O N

INTECS is involved in long-term cooperation with the best European Universities and Research Centers (e.g. Pisa University, CNR) on the major R&D projects (Eureka, Esprit, Horizon 2020, etc.). INTECS organizes international workshops, provides training courses on advanced topics and publishes hundreds of technical papers.

COMPANY MATURITY

INTECS is a very mature and solid company founded in 1974 and is the oldest software company in Italy. Founded with only four people in a large garage in the middle of "Tiburtina Valley" (the area in Rome where most of the high-tech corporations reside), it now has offices in Rome, Naples, Milan, Turin, Pisa, L'Aquila, Genoa and internationally in Paris and Munich. INTECS today has attracted more than 500 engineers.

HIGH TECHNICAL SPIRIT

Since its inception, the focus in INTECS has been on technical systems: complex, embedded, real time, safety and security critical systems. We work in the most demanding sectors such as defense, space, air traffic control, communication, railway, automotive and smart systems. Cross-domain fertilization of know-how is a key asset of INTECS. Our main asset is competence.

INTECS capabilities have been internationally recognized through many certifications and awards, including ISO 9001, EN 9100 (Aerospace and Defense), CMMI (Traffic control and Railway) and Automotive SPICE (Automotive). In addition, INTECS received the award of "Best Supplier" from Finmeccanica in 2009.
