intecs Solutions

the Brainware company

Intecs Solutions, founded in 1974, is an Italian private Company at the forefront in the design and implementation of high-tech electronic systems for the AeroSpace, Defence, Transportation, Smart Systems and Telecommunication markets, where safety, reliability, innovation and quality are the key ingredients for success. **Intecs Solutions** designs and develops applications, tools and software components for complex electronic systems in cooperation with major European and Italian Industries, Organizations, Universities and Research Centers.

Intecs Solutions strongly believes that **Smart Systems** represent a new generation of technology innovation and convergence working together in unprecedented ways to solve smarter and more complex business problems than previous generations of computing.

CYBER SECURITY SEMINAR

Purpose: 1-day seminar will give participants unfamiliar with automotive cybersecurity an introduction to the principal concepts of cybersecurity and major issues surrounding the implementation of a systematic program. While modern techniques of security management in network, hardware, and software are presented, the emphasis is on a risk-based approach to the overall security development lifecycle.

- **Introduction and Overview**
- **Relationship between automotive safety and security**
- **The Security Development Lifecycle**
- **Concept Phase**
- **Hardware level security**
- **Software level security**
- **Network Security**
- **Testing for Security**
- **Case studies**
